

# MOHANAVIJAYAN J

Puducherry, India | +91-9361207221 | mohanavijayanj@gmail.com | LinkedIn | GitHub | Portfolio

## PROFILE SUMMARY

Full Stack Developer skilled in MERN stack and Spring Boot, building secure and scalable web applications with JWT authentication and RBAC. Experienced in frontend optimization and data analytics through professional internships.

## SKILLS

|                                                                            |                                            |                                                         |
|----------------------------------------------------------------------------|--------------------------------------------|---------------------------------------------------------|
| <b>Frontend:</b> HTML5, CSS3, JavaScript, React.js, Bootstrap, TailwindCSS | <b>Database:</b> MongoDB, MySQL            | <b>Tools:</b> Git, Maven, Postman, NPM, Axios, Firebase |
| <b>Backend:</b> Node.js, Express.js, Spring Boot, Security                 | <b>Programming:</b> Java, Python           |                                                         |
|                                                                            | <b>Concepts:</b> REST APIs, JWT, RBAC, OOP |                                                         |

## EXPERIENCE

**Data Science Intern – Ministry of Micro, Small and Medium Enterprises (MSME), India** *Jan–Mar 2025*  
**Sales Analysis of Supermarket | Data Analytics Project | GitHub**

- Developed an interactive sales dashboard using Streamlit for real-time business insights and retail analysis.
- Implemented dynamic filtering enabling data exploration by category, city, and custom date ranges.
- Identified key sales trends and buying patterns through statistical analysis to support inventory strategies.
- Languages:** Python | **Libraries:** Streamlit, Pandas, Plotly Express | **Concepts:** Data Mining

**Frontend Development Intern – CodeAlpha (Virtual) | GitHub** *Dec 2025 – Jan 2026*

- Completed a 1-month virtual internship building interactive web apps: Image Gallery, Calculator, and Music Player.
- Implemented DOM manipulation, event-driven programming, and regex-based validation; optimized modular code structure for maintainability.
- Frontend:** HTML5, CSS3, JavaScript (ES6+) | **APIs:** Audio API, DOM Manipulation | **Tools:** Regex

## PROJECTS

**Online Bus Reservation System | MERN Stack | GitHub**

- Engineered a scalable MERN platform with JWT authentication and BCrypt encryption for secure user data handling.
- Implemented concurrency-safe booking using MongoDB atomic updates; optimized DB performance by 40% via indexing and aggregation pipelines.
- Designed a responsive glassmorphic UI in React.js achieving 95+ Lighthouse scores; integrated RESTful APIs with Axios for seamless data flow.
- Frontend:** React.js, CSS3 | **Backend:** Node.js, Express.js | **Database:** MongoDB | **Tools:** Mongoose, Dotenv

**Employee Management System | Full Stack | GitHub**

- Developed a secure enterprise EMS using Spring Boot and React with Spring Security/JWT authentication.
- Architected a robust RBAC system with role-specific dashboards and automated attendance tracking, cutting manual effort by ~60%.
- Built a real-time analytics engine using Recharts to visualize workforce trends through interactive data charts.
- Frontend:** React.js, Recharts | **Backend:** Spring Boot, Security | **Database:** MySQL | **Tools:** JWT, Maven

**Auspicious Rituals (Maruthi Prohitham) | Full Stack | GitHub**

- Built a Vedic priest service website using React.js, Vite, and TailwindCSS with parallax animations and a premium maroon/gold spiritual UI.
- Implemented bilingual (English/Tamil) localization via a custom translations context for seamless language toggling.
- Integrated Firebase for real-time backend and WhatsApp Business API for direct client-to-priest booking without a traditional server.
- Frontend:** React.js, Vite, TailwindCSS | **Backend:** Firebase | **APIs:** WhatsApp Business, Intersection Observer

**MV Spark Welders Website | Frontend | GitHub**

- Designed a high-conversion business site with scroll-reveal micro-animations and top-tier SEO via semantic HTML5 and schema markup.
- Integrated WhatsApp Business API driving a 30% increase in digital leads; built mobile-first responsive layout using CSS Grid and Flexbox.
- Frontend:** HTML5, CSS3, JavaScript | **Tools/APIs:** Intersection Observer, WhatsApp Business API
